RAMAKRISHNAN M

Generative AI & NLP Enthusiast | Full-Stack (MERN) & Cloud (AWS)

Dindigul, Tamil Nadu, India | +91 9025115724 | ramkrishnanm.dev@gmail.com | linkedin.com/in/ramakrishnannnm | github.com/MRam2006

CAREER OBJECTIVE

Computer Science Engineering graduate with hands-on experience in Full-Stack Development, AWS Cloud, and Generative AI. Seeking an opportunity to apply my technical skills in building scalable applications and AI-driven solutions while continuously developing my expertise in emerging technologies.

TECHNICAL SKILLS

Generative AI / NLP: Transformer Architecture, LLMs, Word2Vec & Word Embeddings, Prompt Engineering, RAG, Vector Databases & Similarity Search, Agentic AI, MCP
ML / Data: Machine Learning, Deep Learning (ANNs), Pandas, Python, SQL
Web & Cloud: React.js, Node.js, Express.js, MongoDB, AWS (EC2, S3, IAM, VPC, RDS, Lambda)
Tools: Git, GitHub, Figma

PROJECTS

AI-Based DNA Codec Prediction System: Twin-Sister AI Architecture for Gene Therapy | Team of 4

- Designed a computational pipeline (DNABERT-2/HyenaDNA + DeepMind Enformer) with a compliance-focused Final Validator Engine (EU MDR, IVDR, HIPAA), replacing physical CRISPR repair screening.

RAG-Based Medical Knowledge Assistant | GitHub

- Built a RAG pipeline over a 4,114-page medical reference (Merck Manuals), chunked into 8,757 segments with MiniLM embeddings and a Chroma vector DB (top-5 retrieval); LLM-judge evaluation scored RAG responses 5/5 on groundedness vs. an ungrounded prompt-only baseline across sepsis, surgery, dermatology, and neurology queries.

Stock Market News Sentiment Analysis | GitHub

- Built and benchmarked 4 sentiment-classification pipelines (Word2Vec vs. BAAI/bge-base-en-v1.5 embeddings x Random Forest vs. Neural Network) on 349 labeled news articles; best pipeline reached 50% test accuracy / 0.44 F1, beating the Word2Vec baseline (42.9% accuracy).

INTERNSHIPS

MERN Stack Developer Intern | Main Flow Services and Technologies Pvt. Ltd. / *Jul 2025 – Aug 2025*

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, implementing responsive user interfaces and RESTful APIs.
- Gained hands-on experience in CRUD operations, API integration, authentication, database management, and real-world MERN stack development.

AWS Cloud Intern | Cultus Skilling and Job Tech / *Aug 2025 – Nov 2025*

- Gained hands-on experience with AWS EC2, S3, IAM, Lambda, VPC, CloudWatch, and Route 53 through practical cloud training and projects.
- Developed practical knowledge of cloud infrastructure, security, deployment, monitoring, and AWS best practices.

INTERNSHIP PROJECTS

Full-Stack MERN Authentication System

- Developed a secure authentication system using MERN stack, JWT, and bcrypt, with user registration and login functionality.
- Implemented RESTful APIs, protected routes, and role-based authorization for secure user access and data management.

AWS Cloud Deployment Project

- Deployed applications on AWS EC2, configured S3 storage and IAM roles, and designed a basic VPC architecture.

EDUCATION

Bachelor of Engineering, Computer Science Engineering –RVS Group of Institutions, Dindigul 2022–2026
